DEPARTMENT OF SCHOOL EDUCATION

CHANDIGARH ADMINISTRATION

ACADEMIC SESSION 2026-27

ANNUAL ACADEMIC AND ACTIVITIES CALENDER

Department aims to provide a conducive environment in the schools for our 'learning community', to enable them to acquire requisite skills and achieve academic excellence along with personal growth. The schools are dedicated to preparing 'the future of our nation' to be conscientious and responsible citizens with a sense of honesty and a spirit of creation.

The curricular and co-curricular activities in the Government schools of UT Chandigarh have been prepared to ensure our students achieve academic excellence, value their history-culture and make them confident, independent and versatile. These holistic development activities during the year will give the students a positive attitude and prepare them to embrace their future.

The school assembly is an integral part of the curriculum in Government UT schools as it helps in inculcating discipline among students, instills pride and a sense of belonging, develop social skills, celebrate festivals and occasions together and from a broader perspective it's all about bringing all students and the school staff together. The schools during the year will be making best use of these assemblies so that every school day is fun and educational for them. The regular PTA meets and parent-teacher interaction planned will strengthen the learning process.

This calendar will also facilitate the functioning in the Government Schools and allowing them to plan an exciting year ahead.

Subject: - Condition Assessment and stability certificate.

Reference: Memo No. GHS/19D/2025/291 dated 21.08.25

As per the site inspection and test results of Non - destructive testing results of Govt. High School, Sector-19D, Chandigarh, following conclusions are drawn:

- The average relative strength of concrete varies from 21-22 N/mm² corresponding to the rebound hammer test.
- The general quality of concrete is in the range of good corresponding to the Ultra sonic Pulse Velocity test.
- The load carrying capacity of the slab and beams can be calculated based on concrete grade M20 and design is found ok as per the relevant codal provisions.
- There were no corrosion, honeycombing, cracks and voids observed at the locations where test were conducted.
- As per test results mentioned above the construction is carried out as per the approved design and drawings.
- Localized spalling and surface deterioration of concrete was observed in ramp and diagonal crack was also observed at the corner junction of the parapet wall which need attention.
- Dampness is evident at multiple locations, especially near horizontal projections and vertical junctions.
- The drawings and design of the buildings are also checked in accordance with the relevant Indian Standard Codes (with latest amendments) including Indian Standard Codes for structure resistant to earthquake.

Hence based on the above conclusions the occupied buildings with respect to stability found to be in good condition and this is valid for 3 years.
